Subject: What are you afraid of?

To whom it may concern,

and with due and proper respect

Why are you not doing your job? Are you an investigative journalist or are you are puppet of the police. Are you simply a spokesman, do you just print the propaganda that they feed you? You were happy to print the article that was blatantly biased that led to my arrest.

Or is it because you are afraid of what you might uncover, that right here, right now, in our community, there is widespread corruption right on your doorstep. Or is it because it is easier to sweep under the carpet than face reality? You don't want to rock the boat? I naively thought that the media was neutral, that they followed leads, wherever they may go. I have supplied you with enough information for you to at least want to investigate further. I have offered you a copy of a tape that comprehensively and completely backs up my claims with inescapable, undeniable proof. Why have you not requested it? Is it because you are part of the conspiracy? Are you too busy with lost dog stories. Get serious. This is a serious matter. The Ombudsman thinks so, the PIC thinks so, I know so. At the very least, do me the courtesy of responding to me with your reason why you are not doing your job that the community expects from you. If this reaches the stage of a royal commission, and you were no where to be seen after everything I have shown you, what sort of light is that going to put you under

I request and expect an answer from you in the very near future

Sincerely yours
